### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed 11/21/06 have been fully considered but they are not persuasive. The pulley system of Gheysen would allow the pulleys to be in an upper and lower position continuously as the jacquard could be left in the current configuration.

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Gheysen (US 5,353,846). Gheysen illustrates in Fig. 3 a jacquard device including two or more set of hooks with each set including complimentary hooks (29, 30) that operates in conjunction to a pulley 21 with complementary hooks (29,30) of one set of hooks operating in conjunction with one pulley 21. Gheysen illustrates a grid of 3 by 2 sets of pulleys with two complementary hooks operating each pulley. It is inherent that when the complementary hooks (29,30) of Gheysen are raised and lowered by knives 60, it will create a group of upper and lower pulleys as claimed. The device would be capable of having the upper row continuously as it could be left in that configuration.

As to claim 6, Gheysen illustrates (Fig. 3) a single element, knife 60, to take multiple sets of hook on selection.

As to claim 7, Gheysen discloses (Col. 1 line 43) that the jacquard is a three position loom.

As to claim 8, Gheysen discloses (Col. 1 line 6) that the device disclosed is for a jacquard machine (loom).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gheysen (US 5,353,846) in view of Derudder (US 5,139,052). Gheysen teaches the device substantially above. Gheysen doesn't the pulleys overlapping each other when projected in the horizontal plane. Derudder teaches pulleys 14 and 17 that are overlapping when projected in the horizontal plane. It would have been obvious to one of ordinary skill in the art to modify the device of Gheysen with that of Derudder to allow the jacquard machine to take up less space.

***Allowable Subject Matter***

Claims 4 and 5 are allowable.

Claims 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claim 3 teaches specific pulley location and structure that is not shown in the prior art.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
